

BUILD AI

Become an AI-Native Engineer in 13 Weeks

The applied AI product engineering apprenticeship for India's most ambitious engineering students.

WHAT THIS IS

BuildAI is not a course. It is a 13-week apprenticeship where you work the way you would inside a real AI-native startup — shipping products, opening pull requests, getting code review from working AI engineers, and deploying applications to production. By Week 13, you have a public portfolio of 5+ deployed AI products.

WHAT YOU'LL BUILD

Full-stack web apps	AI-powered products	Production deployments
Next.js + Supabase + Auth. Real-world web applications with database persistence.	Claude/GPT integration, RAG, embeddings, structured outputs, multi-step workflows.	Vercel, Railway, Fly.io deployments with monitoring, evals, and on-call discipline.

TOOLS YOU'LL MASTER

Cursor • Claude Code • GitHub Copilot • Next.js • Supabase • Anthropic API • OpenAI API • Vercel • Linear • Langfuse

13

WEEKS

5+

DEPLOYED PRODUCTS

100%

REMOTE

13-WEEK CURRICULUM

Six modules. Each one ends with a shipped product.

Module	Title	Window	What you'll ship
M0	AI-Native Operating System	Week 1	One fully working deployed app
M1	Product Engineering Fundamentals	Weeks 2-4	Two deployed apps with auth + DB
M2	AI Product Patterns	Weeks 5-7	One real AI-powered product
M3	Evaluation & Reliability	Week 8	Eval suite that catches regressions
M4	Shipping in a Startup	Weeks 9-10	Team sprint with PR-reviewed code
M5	Capstone	Weeks 11-13	Real product, real users

WHAT YOU LEAVE WITH

PARTICIPATED

Letter of participation. Full portfolio of work.

APPRENTICE CERTIFIED

Public BuildAI certificate. Portfolio listed in our network.

DISTINCTION

Top ~10%. Direct intro to AI-first startups for paid internships.

WHO IT'S FOR

- CS / IT / engineering students (2nd to 4th year)
- Ambitious builders who want startup exposure, not corporate placement
- Students comfortable working remotely and asynchronously
- Anyone who has tried tutorials and wants to ship real products

READY TO APPLY?

Ask your TPO or Training & Placement office about BuildAI.

Cohorts run in summer (April-June) and winter (December-January). Limited seats per cohort. Selection based on a short application + 15-minute conversation.
